

Nano Finisher

Product properties

Only in combination with our Nano-Finisher, your paintwork will get the perfect deep gloss.

Nano particles smoothen your paint for a perfectly sealed surface and form a very fine Nano emulsion for a perfect polishing result. During polishing, prevent overheating to avoid damages on the paintwork.

- protects from over heat during polishing
- fine Nano emulsion
- perfect polishing result
- reduces polisher consumption
- smoothes the paint
- keeps polishing pads clean

Area of application

all paint surfaces and each polish

Application

Shake well before use! Apply polisher like usually and slightly wet the paint with the NANO FINISHER. Make sure that the polishing paste stays always slightly wet. Can be used with all paint polishing products. Reduces the amount of polisher needed.

Consumption

10-15 ml per m²

Technical data

Physical state: liquid

Colour: lighth red

Odour: mild

pH-Value (at 68 °F): 6,0 - 7,0

Boiling point (ERBP): > 90 °C

Flashpoint: > 100 °C

Ignition temperature: > 300 °C

Density at 68 °F: 1,0 g/cm³

Water solubility: miscible

Available size	Item no.	PU
500ml	21600	12
